<b>Date Approved:</b> June 2023	<b>Review Date:</b> June 2024

## Introduction and Purpose

Stoke College undertakes to ensure compliance with the relevant legislation with regard to the provision of first aid for students, staff, parents/guardians and visitors and will make sure that procedures are in place to meet that responsibility. This policy complies with the College's Health and Safety Policy and is reviewed annually.

## Aims and Objectives

To identify the first aid needs of the College in line with the Health & Safety at Work Act 1974 and Management of Health and Safety at Work Regulations 1992 & 1999, Health and Safety (First Aid) regulations 1981 and the DfE Guidance First Aid in Schools, February 2022.

- To ensure that first aid provision is available at all times while people are on the College premises, and also on the premises whilst on College visits.
- To identify the appropriate number of suitably trained people as First Aiders to meet the needs of the College and to maintain a record of that training and review annually.
- To provide relevant training and ensure monitoring of training needs.
- To provide sufficient and appropriate resources and facilities.
- To provide awareness of Health and Safety issues within the College and on College trips, to prevent, where possible, potential dangers or accidents.
- To inform staff and parents/guardians of the College's First Aid arrangements.
- To report, record and where appropriate investigate all accidents.
- To keep accident records and to report to the HSE as required under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulation 1995 (RIDDOR - last updated 2013).

## Policy for First Aid

### First Aid Provision

The location of first aid containers in the College are:

Station 1 – Main Reception

Station 2 – Sixth Form building

Station 3 – Science Block

Station 4 – DT/Food Tech Block

Station 5 – Main Sports Hall

Station 6 – Music Room

Station 7 - Maintenance Staff's Workshop

Station 8 – Dining Hall (Burns kit in this location also)

#### **The Administration Staff will:-**

- Check the contents of each First Aid box and Eyewash station every term, re-stock as necessary and maintain a log of inspection.
- Ensure the current list of First Aiders and Emergency contacts is displayed by each station.
- Ensure the First Aid boxes/Eye Wash stations are clearly labelled and have the correct signage around them.

The Medical Room is designated as the First Aid room for treatment, where appropriate, sickness and the administration of First Aid. This room will be checked weekly by the Administration Staff. When the room has been used, Housekeeping staff will ensure that the room is cleaned down and bedding changed before use. The room is also cleaned daily as part of the cleaning rota.

If a student is unwell during lessons they should consult the member of staff in charge who will assess the situation and decide on the next course of action. The student will, accompanied as necessary, be told to go to see the Receptionist who will decide on the next course of action and provide first aid as required. The student may be taken to the Medical Room along the corridor from Reception where there are first aid facilities including a sink and bed for use as required.

Parents/guardians will be informed of any accidents or illness or injuries sustained as well as details of the first aid treatment administered to their child on the same day or as soon as reasonably practicable. Written records will be kept by staff at the College. Accident forms are to be kept in Reception. Once completed, they are to be returned to the Bursar's office for approval. They will be returned to the Administration Staff and filed electronically via iSAMs.

We will notify local child protection agencies and the Health & Safety Executive of any serious accident or injury to, or death of, any child while in our care and will act on any advice given.

It is the responsibility of staff taking children on College trips or matches to be aware of any students' medical conditions and make sure students have any medication they need. Should a child's medical record show that they may require application of an auto-injector, at least one member of accompanying staff on the trip must be trained in the use and administration of auto-injectors. Should a child's medical record show that they require use of an inhaler or pump, the prescribed inhaler or pump must be taken on the trip.

All staff have a responsibility to sick and injured students to ensure they receive appropriate first aid.

## **First Aid Training**

The Senior Leadership Team will ensure that there is an adequate number of qualified First Aiders and that the required training is undertaken at the required intervals. (See appendix B for list of first aiders.)

Staff will be trained in the use and administration of auto-injectors as required.

## Qualified Staff

The names of all trained First Aiders are listed at each First Aid Station and as an appendix to this document.

## Head Injuries

Accidents involving a student's head can be problematic because the injury may not be evident (e.g. internal) and the effects only become noticeable after a period of time. All head injuries should be monitored closely and a head injury report form should be completed and given to the parents/guardians. This form is stored at Reception and is known to all staff who will be able to issue it upon request.

Any serious head injury should always be referred for Hospital treatment (please follow the section for Emergency Arrangements).

## Emergency Arrangements

Where the injury is an emergency, an ambulance will be called following which the parents/guardians will be contacted. Give the postcode of the College. Where hospital treatment is required but it is not an emergency, then the First Aider or a member of the Administration Staff will contact the parents/guardians for them to take over the responsibility of the child. In the event that the parents/guardians cannot be contacted, the member of the College will accompany the child to hospital and remain with them until the parents/guardians can be contacted:

- In the event of a serious injury
- In the event of any significant head, neck or back injury
- In the event of a period of unconsciousness
- Whenever there is the possibility of a serious fracture or where this is suspected
- Suspected stroke or heart attack
- Anaphylactic shock / use of EpiPen
- Where a child shows symptoms of an asthma attack and does not have a prescribed inhaler or pump

Seriously sick or injured students or adults must not be left alone.

## Hygiene/Infection Control

Hands must be washed before and after giving First Aid. Single-use disposable gloves must be worn when treatment involves blood or other body fluids. Any soiled dressings etc must be put in a yellow clinical waste bag and disposed of in the clinical waste box located in the medical room. Any body fluids on the floor should have absorbent granules sprinkled on to them, then swept up with the designated dustpan and brush available from the Medical Room. This should also go in a yellow bag and be disposed of in the

clinical waste box. The area should be disinfected. Body fluid spillages on hard surfaces should be cleaned up then disinfected. Exposed cuts and abrasions should always be covered.

## Incident Reporting

All incidents/injuries/head injuries/ailments and treatment are recorded either in the accident book or the sickness book held at Reception AND in the student's medical file. Parents/guardians are informed of any head injury. The Administration Staff or the First Aider will contact the parents/guardians if they have any concerns about the injury, or need to send a child home through illness. Any significant injury also needs to be filled out using an Accident Form. This needs to be completed by the person administering First Aid and by the person (if a member of staff) or parent, in the case of the accident, in relation to a student. It is recommended that these records are kept for 7 years. If the nature of the accident involves contacting Reporting of Injuries, Diseases & Dangerous Occurrences Regulations 1995 (RIDDOR Tel: 0845 300 99 23) 2013). See [www.riddor.gov.uk](http://www.riddor.gov.uk). then the Bursar will make contact within 10-14 days.

## Sharing of Information

At the start of the academic year all parents/guardians are asked to complete a medical information sheet. The office will provide relevant members of staff with a list of students who are known to have medical problems along with the individual care plan showing the appropriate treatment and actions with training as appropriate. This will be reviewed at each change of circumstance. Care plans will be available on request. First Aid trained staff are trained in the use of auto-injectors and how to deal with conditions such as epilepsy and asthma

The confidentiality and rights of students as patients are appropriately respected by the College. This includes the right of a student deemed to be "Gillick Competent" to give or withhold consent for his/her own treatment. [Fraser guidelines, more commonly referred to as Gillick competence is used in medical law to decide whether a child (16 years or younger) is able to consent to his or her own medical treatment, without the need for parental permission or knowledge. A child will be Gillick competent if he or she has sufficient understanding and intelligence to understand fully what is proposed].

Medical information about students, regardless of their age, will remain confidential. However, in providing medical care for a student, it is recognised that on occasions first aiders may liaise with parents or guardians, the Head or other academic staff and boarding staff, and that information, ideally with the student's prior consent, will be passed on as appropriate. With all medical matters, staff will respect a student's confidence except on the very rare occasions when, having failed to persuade that student to give consent to divulgence, it is considered by the DSL to be in the student's best interests, or necessary for the protection of the wider College community, to breach confidence and pass information to a relevant person or body.

## Policy for the administration of medication in College

The Board of Directors and staff of Stoke College wish to ensure that students with medication needs receive appropriate care and support at College. The College will accept responsibility in principle for members of the College staff giving or supervising students taking prescribed medication during the College day **where those members of staff have volunteered to do so.**

**Please note that:**

**Parents/guardians should keep their children at home if acutely unwell or infectious. Students should not return to College for at least 48 hours after the last bout of vomiting or diarrhoea, etc.**

**Parents/guardians should notify the College in the case of any sickness or notifiable disease (see appendix A).**

**We will not administer non-prescribed medication to a student such as paracetamol, Calpol, Piriton etc without prior written authorisation from a parent.**

Parents/guardians are responsible for providing the College with comprehensive information regarding the student's condition and medication. **Parents have responsibility to notify the College if their child has a physical or mental condition and failure to do so is a breach of the parent contract.**

Prescribed medication will not be accepted in College without complete written and signed instructions from the parent for each and every medication for the whole course of the treatment. The prescription must come from a doctor, dentist, nurse or pharmacist (medicines containing aspirin will only be given if prescribed by a doctor).

Medicines (both prescription and non-prescription) will only be administered to a child where written permission for that particular medicine has been obtained from the child's parent.

Only reasonable quantities of medication should be supplied to the College (for example, a maximum of four weeks supply at any one time).

Where the student travels on College transport with an escort, parents/guardians should ensure the escort has written instructions relating to any medication sent with the student, including medication for administration during respite care.

Each item of medication must be delivered to Reception, in normal circumstances by the parent, **in a secure and labelled container as originally dispensed**. Each item of medication must be clearly labelled with the following information:

- Student's Name.
- Name of medication.
- Dosage.
- Frequency of administration.
- Date of dispensing.
- Storage requirements (if important).
- Expiry date.

**The College will not accept items of medication in unlabelled containers or that are not in original packaging. Staff will not administer medication where instructions are not in English.**

Students and staff medication will be kept in a secure place, out of the reach of students. Unless otherwise indicated all medication to be administered in College will be kept in a locked medicine cabinet. Some medication will be stored, as required, in a fridge well away from student access. No student may keep

medication with them (including boarders) with the exception of medication contained within prescribed epipens (or where written advice from a medical professional has been provided to the Principal to give advice that medication must be carried by the child - for example where there would be a risk to life if the child did not have immediate access to a medication).

The College will keep records (date, time, amount of medication and name of person administering).

If a child refuses to take medicine, staff will not force them to do so, and will inform the parents/guardians of the refusal, as a matter of urgency, on the same day. If a refusal to take medicines results in an emergency, the College's emergency procedures will be followed.

It is the responsibility of parents/guardians to notify the College in writing if the student's need for medication has ceased or changed.

It is the parents'/guardians' responsibility to renew the medication when supplies are running low and to ensure that the medication supplied is within its expiry date.

The College will not make changes to dosages on parental instructions.

College staff will not dispose of medicines. Medicines, which are in use and in date, should be collected by the parent at the end of each term. Date expired medicines or those no longer required for treatment will be returned immediately to the parent for transfer to a community pharmacist for safe disposal.

For each student with long-term or complex medication needs, Deputy Head Pastoral will ensure that a Medication Plan and Protocol is drawn up, in conjunction with the appropriate health professionals.

If a boarder needs to be isolated, e.g. they have a hacking cough or a sickness bug, in the first instance we shall endeavour to have the child collected from College by a parent or another authorised adult. If this is impossible, the child is isolated in any appropriate room that is empty or can easily be made empty. If this is impractical, then the final solution would be to use Medical Room. Boarding staff will make regular checks on the student or appoint an appropriate person to do so (supervision to be arranged with consideration of the age of the child and the nature of the medical need).

Staff who volunteer to assist in the administration of medication will receive appropriate training/guidance.

The College will make every effort to continue the administration of medication to a student whilst on trips away from the College premises, even if additional arrangements might be required. However, there may be occasions when it may not be possible to include a student on a College trip if appropriate supervision cannot be guaranteed.

Students with Asthma should carry an inhaler with them at all times especially when doing games, swimming, etc. A spare inhaler should be kept in the Medical Room. Students must not use any inhaler other than their own. Staff must not, under any circumstances, administer an inhaler or pump that is not prescribed to a student.

In case of a medical emergency:

- It is essential to remain calm and to protect yourself. Before you enter a scene ensure it is safe from risk of fire, electricity, traffic, smoke, water, poisonous gases, etc. Your personal safety takes precedence.

- If you are a trained first aider, you may take appropriate action. Do not move the victim unless necessary to save his or her life or to prevent further injury.
- Make sure the appropriate emergency services have been called. Make sure either you or any assistant making the call knows which emergency service is required (i.e. Police, ambulance, or Fire)
  - The nature of the emergency
  - The address or location of the casualty
  - The telephone number you are calling from
  - Your name
- Above all, stay calm

## **Contact and review**

Key contact with regard to this policy: Rebecca Watson

Next Review date: June 2024

## APPENDIX A: NOTIFIABLE DISEASES, NHS GUIDANCE

<https://www.gov.uk/guidance/notifiable-diseases-and-causative-organisms-how-to-report#list-of-notifiable-diseases>

### List of notifiable diseases

Diseases notifiable to local authority proper officers under the Health Protection (Notification) Regulations 2010:

- Acute encephalitis
- Acute infectious hepatitis
- Acute meningitis
- Acute poliomyelitis
- Anthrax
- Botulism
- Brucellosis
- Cholera
- COVID-19
- Diphtheria
- Enteric fever (typhoid or paratyphoid fever)
- Food poisoning
- Haemolytic uraemic syndrome (HUS)
- Infectious bloody diarrhoea
- Invasive group A streptococcal disease
- Legionnaires' disease
- Leprosy
- Malaria
- Measles
- Meningococcal septicaemia
- Mumps
- Plague
- Rabies
- Rubella
- Severe Acute Respiratory Syndrome (SARS)
- Scarlet fever
- Smallpox
- Tetanus
- Tuberculosis
- Typhus
- Viral haemorrhagic fever (VHF)
- Whooping cough
- Yellow fever

Report other diseases that may present significant risk to human health under the category 'other significant disease'.

## APPENDIX B: LIST OF FIRST AIDERS (CURRENT SEPTEMBER)

Emergency First Responder		
Mr O Khan	On site	122
Lifeguard
